

CARE INDEED HOME HEALTH

CLIENT CLINICIANS MOCK FILE DUMP

Q1-Q2 2026 - Client/Clinician Assignment & QAPI Risk Dataset

Dataset scope

Normalized mock client roster, clinician assignment load, service line mix, QAPI-required cases, and messy-file review flags from the provided Q1-Q2 2026 dump.

Packet purpose

Create a survey-defensible file-dump view that lets Brad and human reviewers validate staffing, clinical risk, evidence needs, and packet readiness.

Generated packet controls

This packet is mock data only. It is suitable for UI testing, ClberPDF styling checks, QAPI workflow demos, clinician assignment review, and non-production training. It does not contain real PHI.

Packet Control & Table of Contents

Packet contents

1. Executive Summary
2. Clinician Assignment Load
3. Client Roster Dump
4. High-Acuity / QAPI Review Queue
5. Appendix - Data Source Notes

Review checklist

OK - Source text parsed into normalized rows
OK - Client statuses and SOC dates retained
OK - Clinician/RN load summarized
OK - QAPI risk queue surfaced
Review - Mock mappings require human validation before production use

How to use this file dump

Use this packet as a polished printable data dump for Brad-assisted review. It keeps the raw client file context human-readable while separating operational signals: active/discharged census, acuity, clinician load, service lines, QAPI queue, and missing/messy data flags. The layout mirrors the QAPI packet style so it can live beside event packets without feeling like a separate artifact.

Brad review narrative

The mock dataset contains **90** client rows across Q1-Q2 2026. **62** records require QAPI-style follow-up or have high-risk flags. The roster includes **20** unique clinician/RN references, with the highest load carried by **MOCK-CLIN-HA-0003**. The strongest review signal is the high-acuity queue, where messy flags, recertification timing, hospitalizations, and service line complexity should be validated before converting mock data into production workflow tests.

Appendix - Source Notes

Source file

clients.q1q2-2026.mock.txt

Parsing notes

The source dump includes complete high-acuity sample records followed by a summary roster. This generated PDF extracts every JSON array found in the text, normalizes client identity, status, SOC date, clinician/RN assignment, service lines, diagnoses, messy flags, and QAPI signal fields, then renders a printable internal packet.

Production caution

This artifact is a mock file dump. It is not an official clinical record, payroll report, billing export, or locked QAPI packet. Before production reuse, map each source field to the app evidence model and validate generated summaries with a human reviewer.

Included client IDs

MOCK-PT-HA-0001, MOCK-PT-HA-0002, MOCK-PT-HA-0003, MOCK-PT-HA-0004, MOCK-PT-HA-0005, MOCK-PT-HA-0006, MOCK-PT-HA-0007, MOCK-PT-HA-0008, MOCK-PT-HA-0009, MOCK-PT-HA-0010, MOCK-PT-HA-0011, MOCK-PT-HA-0012, MOCK-PT-HA-0013, MOCK-PT-HA-0014, MOCK-PT-HA-0015, MOCK-PT-HA-0016, MOCK-PT-HA-0017, MOCK-PT-HA-0018, MOCK-PT-HA-0019, MOCK-PT-HA-0020, MOCK-PT-HA-0021, MOCK-PT-HA-0022, MOCK-PT-HA-0023, MOCK-PT-HA-0024, MOCK-PT-HA-0025, MOCK-PT-HA-0026, MOCK-PT-HA-0027, MOCK-PT-HA-0028, MOCK-PT-HA-0029, MOCK-PT-HA-0030, MOCK-PT-HA-0031, MOCK-PT-HA-0032, MOCK-PT-HA-0033, MOCK-PT-HA-0034, MOCK-PT-HA-0035, MOCK-PT-HA-0036, MOCK-PT-HA-0037, MOCK-PT-HA-0038, MOCK-PT-HA-0039, MOCK-PT-HA-0040, MOCK-PT-HA-0041, MOCK-PT-HA-0042, MOCK-PT-HA-0043, MOCK-PT-HA-0044, MOCK-PT-HA-0045, MOCK-PT-HA-0046, MOCK-PT-HA-0047, MOCK-PT-HA-0048, MOCK-PT-HA-0049, MOCK-PT-HA-0050, MOCK-PT-HA-0051, MOCK-PT-HA-0052, MOCK-PT-HA-0053, MOCK-PT-HA-0054, MOCK-PT-HA-0055...
